

Design of an EOL Tester of Light Sensor

CASCO Products provides vehicle manufacturers around the world electronics and power outlets, suspension and control sensors, DC-DC converters for green vehicle cockpits, sun sensors to regulate automatic climate control systems, rain sensors, USB and multimedia products for automotive and consumer interface, and lighters.

For our Engineering Department, We are looking for 2 Candidates (**Electronic/ Software Interns**).

You will develop a new EOL Tester for Light Sensor. The main function of the Tester is:

- To generate a light spectrum similar to Sun light spectrum
- To simulate the Different Sun Positions regarding the Vehicle.
- To simulate the LIN communication between the Sensor and the ECU of the Vehicle.

If You are interested, Please fill free to send to your Resume at:

safwen.selmi@casco-cpcn.com

and be in ENISO for an Interview this Saturday Feb, 15th at 11:00.
