

Several Projects (PFE / MSc) in machine learning and medical imaging data analysis are now available at BASIRA Lab!

Brain And Signal Research & Analysis Lab

www.basira-lab.com

BASIRA offers several compelling research projects in data analysis and machine learning with application to healthcare. For highly committed and skilled both undergrad and MSc students who would like to build their research track record (i.e., publications) in medical image analysis, joining BASIRA lab is the opportunity for you. This will allow them to stand out when applying for PhD positions in international labs or even applying for jobs at big companies. Those who are interested, please contact Dr Islem Rekik (irekik@dundee.ac.uk) and attach your CV and cover letter.

Required skills:

A good knowledge of one or more of these programming languages (C++, MATLAB, Python) + high motivation

Skills the student will develop:

Experience in:

- * medical data analysis and processing,
- * network analysis,
- * big data analytics and machine learning techniques
- * scientific writing and presentation

Project date:

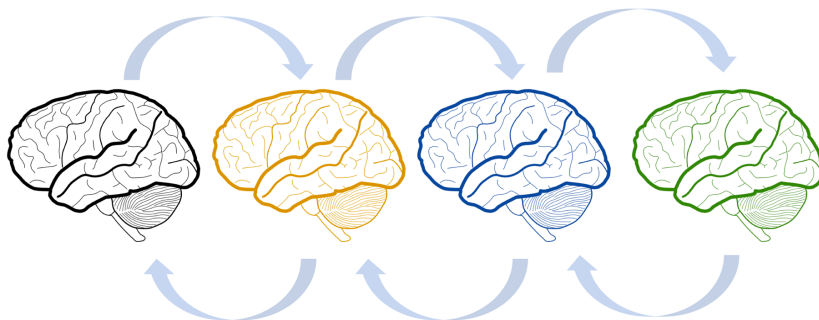

Email Dr Rekik to discuss the project start date.

Project length:

Minimum 4 months.

"The requisites of knowledge: a quick mind, zeal for learning, humility, foreign land, a professor's inspiration, and a life of long span."

Juwaini of Nishapur (d.1085)
