Description de poste

SUNGARD

Intitulé du poste :C++ Software Engineer
Domaine / Industrie :ICT
Lieu de travail :Pôle technologique El Ghazela
Présentation de l'entreprise:

SunGard is one of the world's leading software and technology services companies.

Description du poste:
This is a specialized and stimulating job for a software engineer to work with the TCC trading market gateways team. By "market», we mean an electronic exchange, broker, ECN or information platform, such as Reuters RMDS. As a market gateways developer, you have the overall responsibility for one or more markets. You will be working together with the other member of the Markets team.
The role includes development, maintenance and support of market gateways components for order routing, over the counter trading, quoting and deal capture. Equally important is building and maintaining relationships with market representatives. You must monitor and understand the functionality provided by the market as well as the technical and functional development plans for the market.

Compétences:

-You should have a good knowledge of the C++ programming language.
-Our architecture is object oriented and uses the network programming techniques and you should have good understanding and experience of such techniques.
- All our markets gateways are low-latency and real-time which makes those aspects important in most tasks of the programming and design that you will be involved in.
- You should be familiar with concepts and technologies like TCP/IP, UDP and Sockets.
- Our solution is multi-platform and should be mainly available on Linux and Solaris.
Windows is also used but only for some components.
- Experience in building gateways between software systems in general and any type of previous experience of electronic exchange systems or financial systems would be valuable but is not required.
- Basic understanding of financial products and derivatives is equally useful.
- Experience from automating processes, code generation tools is a big plus.
-Experience in agile development and project management is appreciated since it is an important part of our daily work.
Compétences:
Good level in both French and English

Formation : Engineering degree

Expérience :[0 – 3 ans] ☐X [3 – 5 ans] ☐ [5 – 10ans] ☐ [10 ans et plus]☐
