Description de poste

SUNGARD

Intitulé du poste : Java developer (back office solution)
Domaine / Industrie : ICT
Lieu de travail : Pôle technologique El Ghazela

Présentation de l'entreprise:

SunGard is one of the world's leading software and technology services companies.

Description du poste:

You will be required to work with Java based technologies to compose core services, built by the development team, into fully functioning market specific or customer specific solutions. The solutions will be built using the core platform, integrating other SunGard products to make a complete package. It involves working with java-based technologies, enterprise integration tools, rest web services, in-memory databases and Business Intelligence tools.

Compétences:

3+ years of Java development experience including ideally experience with Integration framework (e.g: Apache Camel, spring integration, ESB / ETL) within a SOA (service oriented architectures)
Experience working with scripting languages (Shell, Python)
Experience with RESTFUL Web Services
Experience with MQ technologies such as ActiveMQ, WebSphere MQ
Experience working with Integration Framework and ETL (Talend / Pentaho) a strong plus
Experience and Expertise with Linux and Windows environments
Experience with service oriented architectures and/or event driven architectures
Expertise with multiple RDMBs systems such as Oracle, SQL Server, MySQL
BPM skills (eg. Oracle BPM, Bonita BPM, J Boss) and knowhow a strong plus
Exposure to Test Driven development, agile methodologies (technologies like JUnit)
Awareness of NoSQL databases is a strong plus
Good communication skills, strong analytical skills
Experience working in a multi-cultural and multi-regional environment
Fluency in English & French (spoken and written)

Formation:

Diploma or equivalent in Engineering or Computer Science
