

## Java Backend and Web Service Developer

**Location: Sousse, Tunisia**

veroDIGIT is a young management consulting company, and we are helping our clients from the insurance and finance industries reshape their operations to make the most out of the continuously increasing digitalization.

Our focus are business processes in portfolio management and sales, actuarial and other insurance-specific challenges as well as development, quality assurance and maintenance of IT solutions. Further we provide general consultancy services, such as project management, coaching and interim management.

### Your Profile

You will fit right into our team if you are a quick thinker, do not shy away from responsibility, have an entrepreneurial spirit, and can win over our clients with your openness and effective communication skills.

Also important is that as basis of your qualification you have a completed Bachelor or master's degree in computer sciences or a related field, and gained extensive professional experience, particularly:

- Advanced knowledge of Java (v11+), REST- resp. Soap- Web Services, Spring, Spring Boot (preferable Spring Cloud) and ORMs ( Hibernate, JPA, etc.)
- Knowledge of software design patterns and OOP
- Routine in working with relational databases
- Experience in build management (Git, SVN, Maven, etc.) and continuous integration (Jenkins, SonarQube, etc.)
- Experience with test frameworks (JUnit, JMockit, Mockito, etc.)
- Experience in agile development methods (Scrum, Kanban)
- Working proficiency in English or German

### What We Offer

- A flat and lean organisational structure
- Career development to suit your needs and ambitions, for example towards leading teams
- Continuous development, through further advanced trainings in different areas, among others
- Above-average compensation with bonuses and benefits
- Flexibility regarding your place of residence and work

## Senior Java Cloud Developer

**Location: Sousse, Tunisia**

veroDIGIT is a young management consulting company, and we are helping our clients reshape their operations to make the most out of the continuously increasing digitalization. Our focus is the finance industry, particular insurance companies, but we are also actively expanding into other areas.

We are currently looking for Senior Java Developers to work with one of our clients, a leading international consulting and IT service provider. In this role you will have the possibility to work on a variety of projects with state-of-the-art technologies and in different, exciting fields such as telecommunications, energy distribution, e-mobility, or transport logistics.

### Your Profile

You will fit right into our team if you are a quick thinker, do not shy away from responsibility, have an entrepreneurial spirit, and can win over our clients with your openness and effective communication skills.

Also important is that as basis of your qualification you have a completed Bachelor or master's degree in computer sciences or a related field, and gained extensive professional experience, particularly:

- Requirement analysis with subject-matter experts
- Design patterns for high-performance and service-oriented software architectures
- Java/JEE and the Spring framework
- Messaging solutions (Apache Kafka)
- Web-based applications (Angular, Vue.js, React, Node.js etc.)
- Build management (Git, Maven, etc.) and CI/CD
- Agile development methods (Scrum, Kanban)
- Unit testing, TDD/BDD with tools such as Cucumber,
- Cloud deployments (Google, Azure) and tools (Docker, Kubernetes)
- Working proficiency in English or German

### What We Offer

- A flat and lean organisational structure
- Career development to suit your needs and ambitions, for example towards leading teams
- Continuous development, through further advanced trainings in different areas, among others
- Above-average compensation with bonuses and benefits
- Flexibility regarding your place of residence and work
